

Unique
PLANTERS

Welcome

Welcome to Unique Planters, we have been manufacturing planters and associated products since 1980 and have developed a large collection by designing and developing our planters and unique finishes to our customers requirements.

We are able to undertake bespoke projects large or small as you will see in our bespoke section; roof gardens, terraces, offices, hotels, private gardens. Working alongside designers and architects, we develop amazing ideas and solutions that will help any business or home. We also work in conjunction with ANS Global, creating living walls for any environment world wide.

Life began in a small workshop in Portsmouth in 1980, with just one member of staff. Today we have over 25 members of staff and 2 large premises on the outskirts of Portsmouth. The first member of staff is still working with us today and many others have been with the company for over 20 years.

Over these years our team has acquired a vast amount of experience we also have an apprenticeship scheme where we pass on our knowledge to the younger generations ensuring the company's growth into the future.

As a company we are always seeking new ideas and developing designs, we love a challenge!

A handwritten signature in black ink, which appears to read "Nicholas Williams". The signature is fluid and cursive, with a long, sweeping underline.

Nicholas Williams
Managing Director

Environment

All Unique Planters products are manufactured using CT (Composite Technology). One of the key components of this innovative material is recycled PET (Polyethylene Terephthalate). **For every 200 kilos produced, an approximate 1,800 plastic bottles** are diverted from landfills and our oceans **helping our environment now and for future generations.**

Composite solutions that make a real difference key benefits

- No deforestation - causing bio products included (such as palm oil).
- Superior strength and flexibility compared to typical low and med/high reactivity resin.
- Water absorption higher than standard unsaturated polyester resins, but good hydrolysis resistance - suggested for pipe and tanks applications.
- Meeting Lloyd's Register requirements for marine.
- Higher HDT, range between 65-100°C.
- Saving natural resources, energy in production process and lower greenhouse gas emissions and use of chemicals.
- Green technology putting recyclable material into our product without sacrificing performance.

Superior mechanical properties

QTY	Typical Low Reactivity		Typical Med/High Reactivity	
	Standard	PET	Standard	PET
Tensile Strength (Mpa)	65	68	55	70
Tensile Elongation (%)	2.1	4.5	1.9	3.5
Flexural Strength (Mpa)	110	120	100	120
HDT+1h 100°C (°C)	55-60	65	75-85	100
Water Absorption		Higher		Higher
Yellowing Resistance dE 500th QUVA		Lower		Lower
LSE Properties		Available		Available
Adhesion Test LSE		Good		Good
Appearance	Clear	Green Opaque	Clear	Green Opaque
Wetting Properties		Similar		Similar

Amount of recycled plastic bottles used in our planters

Planter Example	Weight	Recycled Plastic Bottles Used
Kubico (KU-1)	6 kg	54
Kubico (KU-2)	9 kg	81
Cube 500 (CUB-5)	6 kg	54
Cube 1000 (CUB-10)	15 kg	135

Unique Planters also offer a Refurbishment Package. All our planters can be repaired and recycled, so your planter will never need to end up in landfill sites.

Unique Planters Quality Control & Guarantee

Every Unique Planters products we manufacture is quality controlled to the highest standard for the following;

- ✓ **Strength**
- ✓ **Consolidation**
- ✓ **Material**
- ✓ **Manufacturing Inspection**
- ✓ **Overall Appearance**
- ✓ **Pre Shipment Inspection**

When purchasing a Unique Planters product you can be certain it is a genuine Unique Planters product with our certificate of authenticity and guarantee.

Over the years many company's have tried and are still trying to copy our range of products, by passing off totally inferior copies and finishes, we have come across them and seen the quality.

Think twice about inferior copy planters and products.

LIVING WALLS SIMPLE AND EFFECTIVE GREEN SPACE FOR ANY ENVIRONMENT

Unique Planters work closely with ANS global, one of the leading suppliers of Greenwalls in the U.K. and across the globe.

ANS Global provides support through the process of design, planting, installation and Maintenance of living walls. ANS Global work closely with architects, contractors and proprietors to ensure a flawless finish. The ANS livingwall system is used globally. The system is able to survive in extreme climates from -40c to +40c

VOLKSWAGEN SHOWROOMS

BRENTFORD, UNITED KINGDOM

VW is one of the best known car brands in the world. When building their new showroom in West London they chose to include a huge green wall to improve air quality in the area as well as making the building stand out.

The living wall installed included a stunning pattern, reminiscent of a winding road, to inspire their visitors. The wall is maintained by the specialist Global team. ANS recently completed installing one of our trademark exterior living walls up the façade of West London Volkswagen, Volkswagen's showroom HQ in Brentford. The installation stretches 23m high and 10m wide. It took our team less than a week to install all 1840 modules, working from a scissor lift platform.

VW's architect chose a living wall to boost the building up to a BREEAM sustainability rating of 'Excellent' and achieve an 'A' energy performance rating.

Visit our website and ANS website for more details
www.ansgroupglobal.com | www.uniqueplanters.co.uk

RITZ CARLTON HOTEL

MANAMA, BAHRAIN

The Ritz-Carlton, Bahrain Hotel & Spa, is one of the most magnificent luxury Bahrain hotels, located on a private island between Manama Bay and the city centre. Featuring 245 rooms and suites on a 20-acre resort complex, guests can enjoy awesome views of the Arabian Gulf from the quintessential Italian dining areas, the Al Ghazal ballroom or the outdoor pool and Jacuzzi!

As with all living wall installations in the Middle East, the correct plant selection was critical for the success of this stunning project. The ANS Global team carried out a full site and area survey and composed a list of plants that were native to the local area. By using native species, ANS could be assured that the plants would survive the extreme weather conditions long-term. The components for the project were all sent out to the nursery and the team followed along afterwards. Plants and growing medium were sourced from the local area and all the modules were planted up and left to establish. The installation team then went to site a few weeks later to assist the local construction company with the installation.

M&S

MULTIPLE LOCATIONS, UNITED KINGDOM

Founded in 1884, M&S has grown from a single market stall to an international, multi-channel retailer. Selling stylish, high quality, great value clothing and home products as well as outstanding quality food, responsibly sourced from around 3,000 suppliers globally, M&S has it all covered; especially when it comes to living walls on their stores!

The ANS Living Wall system has been proved by M&S as being the most sustainable, boasting very little water usage and an organic substrate. This enables us to have natural living walls with indigenous planting in each varied location. ANS design the planting palette and the rainwater harvesting systems based on individual stores whether they are new build or retro-fitted. However, although the plant species are varied based on each location, the visual appearance of the M&S brand is kept consistent. The living walls at Newcastle always evergreen with colour providing interest throughout the changing seasons. They also provide cleaner air to the busy urban streets and precincts.

CRYSTAL CRUISES

LOS ANGELES, UNITED STATES

Crystal cruises is a luxury cruise company, who care for their guests, employees and the environment in a truly unrivalled way. With a spirit of goodwill, Crystal sail the globe connecting intimately with communities in ways that are both meaningful & conscientious. Their motto, 'Crystal Cares', says it all.

When travelling on a luxury cruise ship like Crystal Serenity there's a lot of ocean between each destination with very little sign of life. Now travellers can relax and eat beside a beautiful living green wall, giving a sense of terra firma even in the middle of the ocean. ANS Global had to be especially careful in choosing the plants, as these ships – and therefore the walls – would face wildly differing climates as they moved from country to country. We used more sub-tropical plants than we usually might on a single project. These are the first (and still the only) living walls ever to be installed on a cruise ship. We're delighted to report that there's been very little need to replace plants, despite those climatic changes.

PLANTER OPTIONS

False Bases

False bases can be added at any height to our planter range. Standard heights are 35cm for soil and 22cm for hydro. Please specify when placing an order.

Pallet Base

Pallet bases can also be added to larger planters, where movement is required by pallet truck or fork lift.

Recessed Castors, Exterior Castor Brakes & Lockable Castors

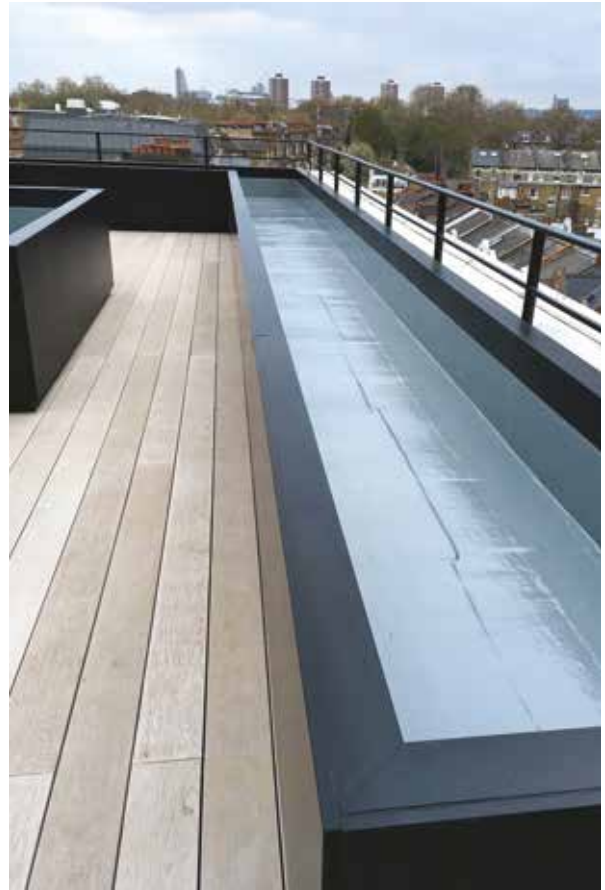

Recessed swivel and recessed lockable castors can also be added to most planters, where movement is required.

ON-SITE LINING

We also offer an on-site composite lining service where wood, metal or other non-waterproof materials are preferred in the construction of planters. We can add our unique composite material on-site to ensure the planters are totally waterproof. Also adding strength, inside or outside of the building or project.

BESPOKE DESIGN

Our bespoke department are able to manufacture any design shape or idea you have small or large, as you will see in this section from large roof terrace projects to small private gardens, get in touch if you have a project or idea.
